

# Quickstart Guide: Connect Your iPhone SE (2nd Generation) to a Wireless Access Point

## Connecting Through the Settings App

Connect to a WAP through the **Settings** app:

1. Tap the **Settings** app on your **Home Screen** or in your **App Library**.
2. Tap **Wi-Fi** to manage your settings.
3. If **Wi-Fi** is off, tap it on.
4. In the **Networks** list, tap the name of the network you want to join.
5. If prompted, enter the password in the **Password** field, then tap **Join**.

### NOTE

*The following Caution admonition is single sourced from a separate file.*

*This note itself is single sourced from yet another separate file.*

### CAUTION

Connecting to a network that lacks password protection puts your personal information at risk of unauthorized access and can expose your phone to malware.

### NOTE

*This note and the following paragraph are single sourced from a separate file.*

Once your iPhone SE (2nd Generation) successfully connects, the network name will appear with a checkmark above the **Networks** list.
