

Connecting Through the Settings App

Connect to a WAP through the **Settings** app:

1. Tap the **Settings** app on your **Home Screen** or in your **App Library**.
2. Tap **Wi-Fi** to manage your settings.

3. If **Wi-Fi** is off, tap it on.
4. In the **Networks** list, tap the name of the network you want to join.
5. If prompted, enter the password in the **Password** field, then tap **Join**.

NOTE

The following Caution admonition is single sourced from a separate file.

This note itself is single sourced from yet another separate file.

CAUTION

Connecting to a network that lacks password protection puts your personal information at risk of unauthorized access and can expose your phone to malware.

NOTE

This note and the following paragraph are single sourced from a separate file.

Once your {iphone} successfully connects, the network name will appear with a checkmark above the **Networks** list.
