# How to Connect Your iPhone SE (2nd Generation) to a Wireless Access Point

## Table of Contents

You can connect your iPhone SE (2nd Generation) to a wireless access point (WAP) through the **Settings** app or **Control Center**.

Connecting to a WAP allows your iPhone SE (2nd Generation) to join a network wirelessly.

|---|---|
| | *This note itself is single sourced from yet another separate file.* |

## Connecting Through the Settings App

Connect to a WAP through the **Settings** app:

1. Tap the **Settings** app on your **Home Screen** or in your **App Library**.

2. Tap **Wi-Fi** to manage your settings.

3. If **Wi-Fi** is off, tap it on.

4. In the **Networks** list, tap the name of the network you want to join.

5. If prompted, enter the password in the **Password** field, then tap **Join**.

| | *This note itself is single sourced from yet another separate file.* |

| CAUTION | Connecting to a network that lacks password protection puts your personal information at risk of unauthorized access and can expose your phone to malware. |
|---|---|

| NOTE | *This note and the following paragraph are single sourced from a separate file.* |
|---|---|

Once your iPhone SE (2nd Generation) successfully connects, the network name will appear with a checkmark above the **Networks** list.

# Connecting Through Control Center

1. Swipe up from the bottom of your iPhone SE (2nd Generation) screen to open Control Center.

Depending on how your **Control Center** is configured, you can access **Wi-Fi** by expanding the **Connectivity** group or the **Wi-Fi** control.

# Expanding the Connectivity Group

1. Expand the **Connectivity** group in one of two ways to view its controls:
   - If the **Connectivity** group is present in **Control Center**, touch and hold the group.
   - Or tap the **Antenna** shortcut in **Control Center**.
2. If **Wi-Fi** is off, tap it on.
3. Touch and hold **Wi-Fi** to display the list of available networks.
4. Tap the name of the network you want to join.
5. If prompted, enter the password in the **Password** field, then tap **Join**.

## Expanding the Wi-Fi Control

1. If the **Wi-Fi** control is present in **Control Center**, complete the following steps:

   ◦ If **Wi-Fi** is off, tap it on.

   ◦ Touch and hold **Wi-Fi** to display the list of available networks.

2. Tap the name of the network you want to join.

3. If prompted, enter the password in the **Password** field, then tap **Join**.
